Profile Summary

Experienced and innovative web developer with a passion for crafting elegant and functional websites. With 2years 11 month of hands-on experience in frontend and backend development, I specialize in turning ideas into robust and scalable web solutions. Proficient in HTML, CSS, JavaScript, and various php frameworks such as Codeigniter,laravel , I leverage the latest web technologies to deliver user-centric designs and seamless user experiences. My expertise extends to backend development with laravel,Node.js, Express.js, and MongoDB, where I create RESTful APIs and manage databases to ensure smooth data flow and efficient application performance. Additionally, I have a solid understanding of responsive design principles, cross-browser compatibility, and web accessibility standards, enabling me to build websites that perform flawlessly across all devices and platforms.
