SUMMARY

Results-driven Backend Developer with hands-on experience in designing, developing, and maintaining scalable server-side applications using PHP (Laravel) and Node.js. Proficient in building robust RESTful APIs, optimizing database performance with MySQL and MongoDB, and integrating third-party services. Adept at implementing best practices in backend architecture, writing clean and maintainable code, and collaborating effectively with cross-functional teams to deliver high-performance applications. Strong understanding of cloud deployment, security principles, and performance optimization.

SKILLS

- JavaScript
- Nodejs
- MySQL
- MongoDB
- AJAX
- JSON
- PHP
- Version Control - GIT
- Laravel
- HTML
- CSS
- API Development
- Team Leadership

EXPERIENCE

11/2024 – 04/2025   **Backend Developer**

Workassist - Lucknow, IN
- Database Management
- API Development
- Website Testing

10/2023 – 10/2024   **Backend Developer**

Logiciel Analytics - Lucknow, IN
- Led a team of backend developers in the design, development, and maintenance of web applications and APIs using PHP Laravel and Node.js.
- Database Management
- API Development
- Client discussion to gather requirements
- Perform Security measures

03/2022 - 09/2023   **Backend Developer**

Observance Solution Pvt Ltd – Lucknow, IN
- Develop services using PHP and Laravel
- Developed RESTful APIs
- Worked on AWS deployments
- Optimized database queries and schema design to improve performance and efficiency, resulting in faster response times and reduced resource consumption

- Website testing

EDUCATION

2021
MCA
International Institute For Special Education, Lucknow.

2019
BCA
International Institute For Special Education, Lucknow.

PROJECTS

- **Logistics Management** (PHP, Laravel, MySQL)
  Developed a web-based logistics management platform using PHP (Laravel) and MySQL to streamline shipment tracking, order processing, vehicle assignment, and delivery status updates.

- **Healthcare** (PHP, Laravel, NodeJS, MySQL, MongoDB)
  This healthcare application enables customers to book diagnostic tests online. Once a booking is confirmed, a phlebotomist (phlebo) is assigned to visit the customer's location to collect the sample. After collection, a runner is dispatched to transport the sample securely to the designated laboratory for processing. The system efficiently manages scheduling, user notifications, and role-based task assignments using Laravel ,Node.js, MySQL and MongoDB.

- **Field Service** (PHP, CodeIgniter, MySQL)
  This project is a **Field Service Booking Platform** developed using **PHP (CodeIgniter)** and **MySQL**, designed to connect users with verified service professionals (plumbers, electricians, cleaners, etc.) similar to **Urban Company**. The system enables customers to browse services, schedule appointments, track service status, and make secure payments online.

- **Loan Management** (PHP, Laravel, MySQL)
  The **Loan Management System** is a web-based application built using **Laravel (PHP Framework)** and **MySQL** database. It is designed to manage the entire loan lifecycle— from borrower eligibility assessment to loan disbursement, EMI schedule generation, and EMI payments.

- **KYS(Know Your Self)** (PHP, Laravel, MySQL)
  The **Know Your Self** is a web-based application built using **Laravel (PHP Framework)** and **MySQL** database. A self-assessment web platform where users can take quizzes to evaluate their personality, mental health, and self-growth areas. Based on quiz responses, users receive categorized results and improvement tips.
