- Successful deployment of this project.
- Used Technologies: HTML, CSS, JavaScript, PHP OOP, MySql, Jquery, Ajax.
- **Live URL: <https://www.happybirthdaytreelovers.org>**

Achievements (Samsung Hackathon)

Participated in the Samsung Campus Hackathon with a dynamic team of four members, successfully developing a real-life project named 'Street Solution' within a tight timeframe of three days. The project aimed at addressing community concerns by implementing a feedback collection system from the public regarding street-related issues. Our solution streamlined the process of communicating feedback to the respective road departments within the government. **As a result of our dedication and hard work, the project not only provided a practical solution to a real-world problem but also earned recognition in the form of a certificate from Samsung.**
